## Important Information

### For your safety

To prevent severe injury and loss of life/property, read this section carefully before using the product to ensure proper and safe operation of your product.

#### WARNING

##### Power connection

- Use only the power source marked on the product.
- Do not overload power outlets and extension cords. This can result in the risk of fire or electric shock.
- Completely insert the AC adaptor/power plug into the power outlet. Failure to do so may cause electric shock and/or excessive heat resulting in a fire.
- Regularly remove any dust, etc. from the AC adaptor/power plug by pulling it from the power outlet, then wiping with a dry cloth. Accumulated dust may cause an insulation defect from moisture, etc. resulting in a fire.
- Unplug the product from power outlets if it emits smoke, an abnormal smell, or makes an unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped emitting and contact an authorized service center.
- Unplug from power outlets and never touch the inside of the product if its casing has been broken open.
- Never touch the plug with wet hands. Danger of electric shock exists.

##### Installation

- To prevent the risk of fire or electrical shock, do not expose the product to rain or any type of moisture.
- Do not place or use this product near automatically controlled devices such as automatic doors and fire alarms. Radio waves emitted from this product may cause such devices to malfunction resulting in an accident.

- Do not allow the AC adaptor or telephone line cord to be excessively pulled, bent or placed under heavy objects.

##### Operating safeguards

- Unplug the product from power outlets before cleaning. Do not use liquid or aerosol cleaners.
- Do not disassemble the product.
- Do not spill liquids (detergents, cleansers, etc.) onto the telephone line cord plug, or allow it to become wet at all. This may cause a fire. If the telephone line cord plug becomes wet, immediately pull it from the telephone wall jack, and do not use.

##### Medical

- Consult the manufacturer of any personal medical devices, such as pacemakers or hearing aids, to determine if they are adequately shielded from external RF (radio frequency) energy. (The product operates in the frequency range of 1.88 GHz to 1.90 GHz, and the RF transmission power is 250 mW (max.).)
- Do not use the product in health care facilities if any regulations posted in the area instruct you not to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

#### CAUTION

##### Installation and location

- Never install telephone wiring during an electrical storm.
- Never install telephone line jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- The AC adaptor is used as the main disconnect device. Ensure that the AC outlet is installed near the product and is easily accessible.
- This product is unable to make calls when:

## Important Information

- the handset batteries need recharging or have failed.
- there is a power failure.

### Battery

- We recommend using the batteries noted on page 3. **USE ONLY rechargeable Ni-MH batteries AAA (R03) size.**
- Do not mix old and new batteries.
- Do not open or mutilate the batteries. Released electrolyte from the batteries is corrosive and may cause burns or injury to the eyes or skin. The electrolyte is toxic and may be harmful if swallowed.
- Exercise care when handling the batteries. Do not allow conductive materials such as rings, bracelets, or keys to touch the batteries, otherwise a short circuit may cause the batteries and/or the conductive material to overheat and cause burns.
- Charge the batteries provided with or identified for use with this product only, in accordance with the instructions and limitations specified in this manual.
- Only use a compatible base unit (or charger) to charge the batteries. Do not tamper with the base unit (or charger). Failure to follow these instructions may cause the batteries to swell or explode.

## Important safety instructions

When using your product, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Do not use this product near water for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of

batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

### SAVE THESE INSTRUCTIONS

## For best performance

### Base unit location/avoiding noise

The base unit and other compatible Panasonic units use radio waves to communicate with each other.

- For maximum coverage and noise-free communications, place your base unit:
  - at a convenient, high, and central location with no obstructions between the handset and base unit in an indoor environment.
  - away from electronic appliances such as TVs, radios, personal computers, wireless devices, or other phones.
  - facing away from radio frequency transmitters, such as external antennas of mobile phone cell stations. (Avoid putting the base unit on a bay window or near a window.)
- Coverage and voice quality depends on the local environmental conditions.
- If the reception for a base unit location is not satisfactory, move the base unit to another location for better reception.

### Environment

- Keep the product away from electrical noise generating devices, such as fluorescent lamps and motors.
- The product should be kept free from excessive smoke, dust, high temperature, and vibration.
- The product should not be exposed to direct sunlight.
- Do not place heavy objects on top of the product.
- When you leave the product unused for a long period of time, unplug the product from the power outlet.
- The product should be kept away from heat sources such as heaters, kitchen stoves, etc. It should not be placed in rooms where the temperature is less than 0 °C or greater

## Important Information

than 40 °C. Damp basements should also be avoided.

- The maximum calling distance may be shortened when the product is used in the following places: Near obstacles such as hills, tunnels, underground, near metal objects such as wire fences, etc.
- Operating the product near electrical appliances may cause interference. Move away from the electrical appliances.

### Routine care

- **Wipe the outer surface of the product with a soft moist cloth.**
- Do not use benzine, thinner, or any abrasive powder.

### Other information

**CAUTION:** Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

### Notice for product disposal, transfer, or return

- This product can store your private/confidential information. To protect your privacy/confidentiality, we recommend that you erase information such as phonebook or caller list entries from the memory before you dispose of, transfer, or return the product.

### Information on Disposal in other Countries outside the European Union

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

### Note:

- Design and specifications are subject to change without notice.
- The illustrations in these instructions may vary slightly from the actual product.
- The range of the handset under maximum conditions is 60 meters indoors and 300 meters outdoors. Please note it will probably be shortened when near concrete barriers, etc.

## Getting Started

### Setting up

#### Connections

##### ■ Base unit

- Use only the supplied Panasonic AC adaptor.\*1
- If you do not connect the telephone line cord and use only cellular lines, set the cellular line only mode to use this unit more conveniently (page 16).

\*1 PNLV226BX: KX-TG7841BX  
PNLV226E: KX-TG7841UE

\*DSL/ADSL filter (not supplied) is required if you have DSL/ADSL service.

### Battery installation

- USE ONLY Ni-MH batteries AAA (R03) size.
- Do NOT use Alkaline/Manganese/Ni-Cd batteries.
- Confirm correct polarities (⊕, ⊖).

- When the date and time setting is displayed, see page 13.

### Battery charging

Charge for about 7 hours.

- When the batteries are fully charged, "Fully charged" is displayed.

Confirm "Charging" is displayed.

### Note when setting up

#### Note for connections

- The AC adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use.)
- The AC adaptor should be connected to a vertically oriented or floor-mounted AC outlet. Do not connect the AC adaptor to a ceiling-mounted AC outlet, as the weight of the adaptor may cause it to become disconnected.

#### Note for battery installation

- Use the supplied rechargeable batteries. For replacement, we recommend using the Panasonic rechargeable batteries noted on page 3, 6.
- Wipe the battery ends (+, -) with a dry cloth.
- Avoid touching the battery ends (+, -) or the unit contacts.

#### Note for battery charging

- It is normal for the handset to feel warm during charging.
- Clean the charge contacts of the handset and base unit with a soft and dry cloth once a month. Before cleaning the unit, disconnect from power outlets and any telephone line cords. Clean more often if the unit is exposed to grease, dust, or high humidity.

#### Battery level

### Panasonic Ni-MH battery performance (supplied batteries)

Operation	Operating time
In continuous use	10 hours max.*1
Not in use (standby)	8 days max.*1

\*1 If eco mode is on.

#### Note:

- Actual battery performance depends on usage and ambient environment.
- Even after the batteries are fully charged, the handset can be left on the base unit without any ill effect on the batteries.
- The battery level may not be displayed correctly after you replace the batteries. In this case, place the handset on the base unit and let it charge for at least 7 hours.

### Intelligent eco mode

This feature automatically reduces handset power consumption by suppressing handset transmission power when the handset is close to the base unit.

- When this feature is activated, **ECO** is displayed. However, during a cellular call, **ECO** is not displayed even though this feature is activated.

## Initial settings

### ■ Direct command code:

Programmable settings can be accessed by pressing **[MENU]**, **[#]**, and then the corresponding code on the dial keypad (page 31).

**Example:** Press **[MENU][#][1][0][1]**.

### ■ Symbol meaning:

**Example:** **[↕]**: "off"

Press **[▼]** or **[▲]** to select the words in quotations.

## Date and time

### Important:

- When you install the batteries for the first time, the handset may prompt you to set date and time. First press **[SELECT]**, then proceed to step 2.

### Handset

- [MENU][#][1][0][1]**
- Enter the current date, month, and year by selecting 2 digits for each.  
**Example:** 15 July, 2013  
**[1][5][0][7][1][3]**
- [OK]**
- Enter the current hour and minute (24-hour clock format) by selecting 2 digits for each.  
**Example:** 21:30  
**[2][1][3][0]**
- [SAVE] → [OFF]**

### Note:

- The date and time may be incorrect after a power failure. In this case, set the date and time again.

## Dialing mode

If you cannot make calls, change this setting according to your telephone line service. The default setting is "Tone".

"Tone": For tone dial service.

"Pulse": For rotary/pulse dial service.

### Handset

- [MENU][#][1][2][0]**
- [↕]**: Select the desired setting.
- [SAVE] → [OFF]**

## Link to Cell

### Link to cell feature

To use this feature, you must first pair and connect your cellular phones to the base unit (page 14).

Your cellular phones must have Bluetooth wireless technology that is compatible with this product.

This feature allows you to:

- make or answer cellular calls using your home phone (handset or base unit) with better reception.
- maximize the benefits of cellular services (such as free night and weekend calls, or cellular to cellular call plans) by utilizing unused peak minutes with your home phone.
- conserve the battery power of your cellular phone while the unit is on a cellular call. (We recommend charging your cellular phone during the cellular call as your cellular phone battery is being consumed.)

#### Important:

- You may pair a maximum of 2 cellular phones and 1 headset. However, the base unit allows only one Bluetooth to be active at a time.
- Locate your cellular phone near the base unit. If the cellular phone is too close to the base unit during a cellular call, you may hear noise. For best performance, we recommend placing the cellular phone between 0.6 m to 3 m away from the base unit.

### Pairing a cellular phone

#### Important:

- Before pairing a Bluetooth enabled cellular phone to the base unit, make sure that no other Bluetooth device such as a Bluetooth headset is connected to your cellular phone.

#### 1 Handset:

For CELL 1: **[MENU]#6241**  
For CELL 2: **[MENU]#6242**

- After the CELL 1 or CELL 2 indicator on the base unit starts flashing, the

rest of the procedure must be completed within 5 minutes.

#### 2 Your cellular phone:

While the CELL 1 or CELL 2 indicator is flashing, follow the instructions of your cellular phone to enter the pairing mode.

- Depending on your cellular phone, it may ask you to enter the base unit PIN (default: "0000").

#### 3 Handset:

Wait until a long beep sounds.

- It may take more than 10 seconds to complete pairing.
- When the CELL 1 or CELL 2 indicator lights up, the cellular phone is connected to the base unit. You are ready to make cellular calls.

#### 4 [OFF]

#### Note:

- Make sure that your cellular phone is set to connect to this product automatically. Refer to your cellular phone's operating instructions.
- Make sure you cancel your cellular phone's current pairing if you want to pair it to the other line (page 14).

### Unpairing a cellular phone

You can cancel the pairing of a cellular phone that is stored in the base unit.

#### Handset

1 For CELL 1: **[MENU]#6111**  
For CELL 2: **[MENU]#6112**

#### 2 [↕]: "Yes" → [SELECT]

- When the cellular phone is unpaired, the CELL 1 or CELL 2 indicator is turned off.

#### 3 [OFF]

## Link to cell settings

### Selecting which unit receives cellular calls

You can select which unit rings and receives calls for a cellular line. When “**all**” is selected, the handset and the base unit ring.

#### Handset

- 1 For CELL 1: **[MENU]#6271**  
For CELL 2: **[MENU]#6272**
- 2 **[↕]**: Select the handset or “**all**”. →  
**[SAVE]**
- 3 **[OFF]**

#### Note:

- When you select the handset to receive calls for a cellular line the base unit can answer the calls even though it does not ring. However, you can make the base unit ring by adjusting the base unit ringer volume (page 33).
- When you change the setting to “**all**”, the base unit ringer volume also returns to the lowest level even if the ringer volume has been changed.

### Ring as cell mode

Once this feature is turned on, the handset and base unit ring using the same ringer tone as your cellular phone.

The following settings are available:

- “**Off**”: Turn this feature off to use the ringer tones of the handset and base unit. Caller information is announced depending on the Talking Caller ID setting (page 35).
- “**On (with Talking CID)**” (default): The handset and base unit use your cellular phone’s ringer tone. Caller information is announced even if the Talking Caller ID is turned off.
- “**On (without Talking CID)**”: The handset and base unit use your cellular phone’s ringer tone. Caller information is not announced even if the Talking Caller ID is turned on.

#### Important:

- To use this feature, your cellular phone must support Bluetooth in-band ringtone. Refer to your cellular phone’s operating instructions.

#### Handset

- 1 For CELL 1: **[MENU]#6141**  
For CELL 2: **[MENU]#6142**
- 2 **[↕]**: Select the desired setting.
- 3 **[SAVE] → [OFF]**

#### Note:

- The units use the preset ringer tones (page 34) instead of your cellular phone’s ringer tone when a cellular call is being received if:
  - your cellular phone is in night mode (depending on your cellular phone).
  - the base unit is in use.
- If your cellular phone is in night mode with “**On (with Talking CID)**” set, the unit announces caller information even when Talking Caller ID is turned off (page 35).

### To use the handset ringer tone instead of your cellular phone’s ringer tone

Select “**off**” in step 2, “Ring as cell mode”, page 15.

To change the handset ringer tone for a cellular line, see page 33.

### Auto connection to the cellular phone

After pairing, your cellular phone is connected to the base unit. If you move the cellular phone out of base unit range, the cellular phone is disconnected from the base unit. This feature allows the base unit to try to reconnect the cellular phone at regular intervals when it returns within base unit range. You can set the interval. The default setting is “**1 min**”.

#### Important:

- When you are using a cellular line or a Bluetooth headset, the base unit loses its

## Link to Cell

connection from other Bluetooth devices (cellular phone or headset). To automatically resume the connection to cellular phones, leave the auto connection on.

- Some cellular phones lose connection after usage, please check the specifications of your cellular phone for more details.

### Handset

- 1 **[MENU]#632**
- 2 **[↓]**: Select the desired setting.
- 3 **[SAVE] → [OFF]**

### Note:

- Some cellular phones may ask you if you accept the connection requirement from the base unit. In that case, select “off” in step 2. Check the specifications of your cellular phone.

## Connecting/disconnecting the cellular phone manually

If you will not be using the paired cellular phone's link to cell feature temporarily (for example, you do not want the unit to ring when your cellular line receives a call), you can disconnect your cellular phone from the base unit. If you want to use it again, reconnect the cellular phone to the base unit.

### Note:

- Even if a paired cellular phone was disconnected from the base unit, if it is brought within the base unit's range during the auto connection interval, it may automatically connect to the base unit (page 15).
- A disconnected cellular phone is not unpaired from the base unit, so pairing it to the base unit again is unnecessary.

### Handset

- 1 **To connect/disconnect:**  
For CELL 1: **[MENU]#6251**  
For CELL 2: **[MENU]#6252**
  - A long beep sounds.
- 2 **[OFF]**

## Cellular line only mode (If you do not use the landline)

If you do not use the landline, we recommend setting the unit to the cellular line only mode.

### Important:

- If you turn on the “Cell line only mode”, disconnect the telephone line cord from the base unit. Otherwise the “Cell line only mode” cannot be activated.

### Handset

- 1 **[MENU]#157**
- 2 **To turn on:**  
**[↓]**: “On” → **[SELECT] →**  
**[↓]**: “Yes” → **[SELECT]**  
**To turn off:**  
**[↓]**: “Off” → **[SELECT]**

### Note:

- Once you set this mode, you can use the following buttons to make cellular calls:
  - for the handset, press **[📞]** or **[📞]** instead of **[CELL]** (page 18).
  - for the base unit, press **[📞]** instead of the line button (**[CELL 1]** or **[CELL 2]**) set for the cellular line selection (page 17, 24).
- Once you set this mode, the following features cannot be used:
  - Landline features (page 37)
  - Answering system (page 48)  
Messages cannot be received.

## Power back-up operation for landline

When a power failure occurs, the charged handset temporarily supplies power to the base unit (power back-up mode). This allows you to make and receive landline calls using a handset during a power failure. The base unit will not perform any other functions. You can program “Power failure” and the default setting is “Auto” (page 36).

### Important:

- If a handset is not placed on the base unit when a power failure occurs, “Base no power Press OFF” is displayed. After pressing **[OFF]** on the handset, place it on the base unit to start power back-up mode.
- Power back-up mode will not work if the battery level of the power supplying handset is  or .
- Do not lift the power supplying handset from the base unit during power back-up mode.
- Do not touch the handset’s charge contacts during power back-up mode.

- If the battery level is low, the unit will not work sufficiently during power back-up mode. In addition, in case handset battery power runs out, we recommend connecting a corded-type telephone (without AC adaptor) to the same telephone line or to the same telephone line jack using a T-adaptor.

---

## Panasonic Ni-MH battery performance (supplied batteries) during power back-up mode

When the batteries are fully charged, operating time of the handset in power back-up mode varies depending on usage.

- Continuous use of the handset in power back-up mode: 1.5 hours max.
- Not in use in power back-up mode: 2 hours max.

### Note:

- Actual battery performance depends on usage and ambient environment.

---

## Making calls during a power failure

### Chain dial

This feature allows you to dial phone numbers in the phonebook while you are on a call. This feature can be used, for example, to dial a calling card access number or bank account PIN that you have stored in the phonebook, without having to dial manually.

#### Handset / Base unit

- 1 Proceed with the operation for your unit. During an outside call:  
Handset: [MENU] → [↕]: "Phonebook" → [SELECT]  
Base unit: 
- 2 [↕]: Select the desired entry.
- 3 Press [CALL] to dial the number.

#### Note:

- When storing a calling card access number and your PIN in the phonebook as one phonebook entry, press [▲] (Pause) to add pauses after the number and PIN as necessary (page 19).
- If you have rotary/pulse service, you need to press  (TONE) before pressing [MENU] on the handset or  on the base unit in step 1 to change the dialing mode temporarily to tone. When adding entries to the phonebook, we recommend adding  (TONE) to the beginning of phone numbers you wish to chain dial (page 27).

## Speed Dial

### Speed dial

You can assign 1 phone number to each of the dial keys ([1] to [9]) on the handset.

### Adding phone numbers to speed dial keys

#### ■ By entering phone numbers:

- 1 Press and hold the desired speed dial key ([1] to [9]). → **[ADD]**
- 2 [↕]: "Manual" → **[SELECT]**
- 3 Enter the party's name (16 characters max.). → **[OK]**
- 4 Enter the party's phone number (24 digits max.). → **[OK]**
- 5 **[SELECT]** → **[OFF]**

#### ■ From the shared phonebook:

- 1 Press and hold the desired speed dial key ([1] to [9]). → **[ADD]**
- 2 [↕]: "Phonebook" → **[SELECT]**
- 3 [↕]: Select the desired entry.
- 4 **[SAVE]** → **[OFF]**

#### Note:

- If you edit a phonebook entry which is assigned to a speed dial key, the edited entry does not transfer to the speed dial key.

### Editing an entry

- 1 Press and hold the desired speed dial key ([1] to [9]). → **[MENU]**
- 2 [↕]: "Edit" → **[SELECT]**
- 3 Edit the name if necessary (16 characters max.; page 27). → **[OK]**
- 4 Edit the phone number if necessary (24 digits max.). → **[OK]**
- 5 **[SELECT]** → **[OFF]**

### Erasing an entry

- 1 Press and hold the desired speed dial key ([1] to [9]). → **[MENU]**
- 2 [↕]: "Erase" → **[SELECT]**
- 3 [↕]: "Yes" → **[SELECT]**
- 4 **[OFF]**

### Viewing speed dial key assignments

You can see the speed dial key assignments on the handset display.

Press and hold the desired speed dial key ([1] to [9]).

### Making a call using a speed dial key

#### ■ Using a cellular line:

- 1 Press and hold the desired speed dial key ([1] to [9]).
- 2 **[CELL]**
  - The unit starts dialing when:
    - only 1 cellular phone is paired.
    - a specific line is set to make cellular calls (page 17).
- 3 [↕]: Select the desired cellular phone. → **[SELECT]**

#### ■ Using the landline:

- 1 Press and hold the desired speed dial key ([1] to [9]).
- 2 **[☎]**

## Programmable settings

You can customize the unit by programming the following features.  
To access the features, there are 2 methods.

### Handset / Base unit

#### ■ Scrolling through the display menus

- 1 [MENU]
- 2 Press [▼] or [▲] to select the desired main menu. → [SELECT]
- 3 Press [▼] or [▲] to select the desired item from the next sub-menus. → [SELECT]
- 4 Press [▼] or [▲] to select the desired setting. → [SAVE]
  - This step may vary depending on the feature being programmed.
  - To exit the operation, press [OFF] on the handset or [EXIT] on the base unit.

#### ■ Using the direct command code

- 1 [MENU] → Enter the desired code.  
**Example:** Press [MENU][#][1][0][1].  
 For available code:
  - Handset: see page 31.
  - Base unit: see page 36.
- 2 Select the desired setting. → [SAVE]
  - This step may vary depending on the feature being programmed.
  - To exit the operation, press [OFF] on the handset or [EXIT] on the base unit.

#### Note:

- In the following table, < > indicates the default settings.
- In the following table, (☞) indicates the reference page number.
- Display menu order and sub-menu may vary depending on your model.

- \*1 This menu is not displayed when scrolling through the display menus. It is only available in direct command code.
- \*2 When the cellular line only mode is turned on, these menus are not displayed (page 16).
- \*3 After the Bluetooth device is paired, the device name is displayed.
- \*4 For CELL 1
- \*5 For CELL 2
- \*6 If you program these settings using one of the units, you do not need to program the same item using another unit.
- \*7 If you select one of the melody ringer tones, it will continue to play for several seconds even if the caller has already hung up. You may either hear a dial tone or no one on the line when you answer the call.
- \*8 The preset melodies in this product are used with permission of © 2009 Copyrights Vision Inc.
- \*9 If the Caller ID time and date display service is available in your area, this feature allows the unit to automatically adjust the date and time each time caller information including date and time is received.  
To turn this feature on, select "Caller ID auto". To turn this feature off, select "Manual". (Caller ID subscribers only)  
To use this feature, set the date and time first (page 13).
- \*10 This tone lets you know when you receive an outside call while you are on another line or an intercom call. If you select "On", the tone sounds 2 times.
- \*11 Turn this feature off if you prefer not to hear key tones while you are dialing or pressing any keys, including confirmation tones and error tones.
- \*12 If you subscribe to a Caller ID service and want to view the caller's information after lifting up the handset to answer a call, turn off this feature.
- \*13 The flash time depends on your telephone exchange or host PBX. Contact your PBX supplier if necessary.

## Programming

- \*14 Generally, the line mode setting should not be changed. This setting automatically maintains receiver volume at the proper level depending on the current telephone line condition. Set the line mode to “**A**” if telephone line condition is not good.
- \*15 This setting is available when a cellular phone is paired.
- \*16 This setting is available when a headset is paired.

### Special programming

#### Alarm

An alarm sounds at the set time for 3 minutes once or daily.

##### Important:

- Set the date and time beforehand (page 13).

##### Handset

- 1 **[MENU]** **#** **7** **2** **0**
- 2 **[↕]**: Select the desired alarm option. → **[SELECT]**

“ <b>OFF</b> ”	Turns alarm off. Go to step 6.
“ <b>Once</b> ”	An alarm sounds once at the set time.
“ <b>Daily</b> ”	An alarm sounds daily at the set time. Go to step 4.

- 3 Enter the desired date and month. → **[OK]**
- 4 Set the desired time. → **[OK]**
- 5 **[↕]**: Select the desired alarm tone. → **[SELECT]**
  - We recommend selecting a different ringer tone from the one used for outside calls.
- 6 **[SELECT]** → **[OFF]**
  - When the alarm is set, **⓪** is displayed.

##### Note:

- To stop the alarm, press **[OFF]** or place the handset on the base unit.
- When the handset is in use, the alarm will not sound until the handset is in standby mode.

#### Night mode

Night mode allows you to select a period of time during which the handset and/or base unit will not ring for outside calls. This feature is useful for time periods when you do not want to be disturbed, for example, while sleeping. Night mode can be set for each unit.

##### Important:

- Set the date and time beforehand (page 13).
- If you have set the alarm, the alarm sounds even if the night mode is turned on.

#### Turning night mode on/off

##### Handset

- 1 **[MENU]** **#** **2** **3** **8**
- 2 **[↕]**: Select the desired setting. → **[SAVE]**
  - If you select “**OFF**”, press **[OFF]** to exit.
- 3 Enter the desired hour and minute you wish to start this feature. → **[OK]**
- 4 Enter the desired hour and minute you wish to end this feature.
- 5 **[SAVE]** → **[OFF]**
  - When the night mode is set, **☾** is displayed.

##### Base unit

- 1 **[MENU]** **#** **2** **3** **8**
- 2 **[↕]**: Select the desired setting. → **[SAVE]**
  - If you select “**OFF**”, press **[EXIT]** to exit.
- 3 Enter the desired hour and minute you wish to start this feature. → **[OK]**

- 4 Enter the desired hour and minute you wish to end this feature.
- 5 **[SAVE] → [EXIT]**
  - When the night mode is set,  is displayed.

### Changing the start and end time

#### Handset / Base unit

- 1 **[MENU]#1237**
- 2 Continue from step 3 for handset or step 3 for base unit, "Turning night mode on/off", page 38.

### Changing the handset name

The handset can be given a customized name ("Bob", "Kitchen", etc.). This is useful when you make intercom calls. You can also select whether or not the handset name is displayed in standby mode. The default setting is "No". If you select "Yes" without entering any handset name, "Handset 1" is displayed.

#### Handset

- 1 **[MENU]#104**
- 2 Enter the desired name (max. 10 characters; see the character table, page 27).
  - If not required, go to step 3.
- 3 **[SAVE]**
- 4 **[↕]**: Select the desired setting. → **[SELECT]** 2 times
- 5 **[OFF]**

### Call block (Caller ID subscribers only)

This feature allows the unit to reject calls when:

- the unit receives a call from a phone number stored in the call block list as unwanted ("Storing unwanted callers", page 39).
- the unit receives a call without phone number ("Blocking incoming calls without phone number", page 40).

When a call is received, the unit rings for a short time\*1 while the caller is being identified. If the phone number matches an entry in the call block list, the unit emits no sound to the caller, and disconnects the call.

\*1 This is called first ring. If you do not want the first ring to sound, turn this setting to "Off" (page 40).

#### Important:

- When the unit receives a call from a number that is stored in the call block list or a call without a recognized phone number, the call is logged in the caller list (page 42) with  after the call is disconnected.
- You can program this setting using either the base unit or the handset.

### Storing unwanted callers

You can store up to 250 phone numbers in the call block list.

#### Important:

- You must store the phone number with an area code in the call block list.

#### ■ From the caller list:

#### Handset

- 1 **[▼] CID**
- 2 **[↕]**: Select the entry to be blocked.
- 3 **[MENU]**

### Note for handset and base unit:

- When editing, press the desired dial key to add, **[CLEAR]** to erase.
- When viewing, “Block w/o num” is displayed if the blocking incoming calls without phone number feature is turned on. To turn the feature off: **[ERASE]** → **[v]** → **[SAVE]** → **[OFF]** (Handset) or **[EXIT]** (Base unit)

## Using Caller ID service

### Important:

- This unit is Caller ID compatible. To use Caller ID features, you must subscribe to Caller ID service. Contact your service provider/telephone company for details.

## Caller ID features

### Handset / Base unit

When an outside call is being received, the caller information is displayed.

Caller information for the last 50 callers is logged in the caller list from the most recent call to the oldest.

- If the unit cannot receive caller information, the following is displayed:
  - “**Out of area**”: The caller dials from an area which does not provide a Caller ID service.
  - “**Private caller**”<sup>\*1</sup> / “**Private**”<sup>\*2</sup>: The caller requests not to send caller information.
- If the unit is connected to a PBX system, caller information may not be properly received. Contact your PBX supplier.
- If the name display service is available in your area, the display shows caller names. For further information, please contact your service provider/telephone company.

\*2 Base unit

## Missed calls

### Handset / Base unit

If a call is not answered, the unit treats it as a missed call. The display shows “**Missed call**”.

### Note:

- Even when there are unviewed missed calls, “**Missed call**” disappears from the standby display if the following operation is performed by one of the units:
  - A handset is replaced on the base unit.
  - Pressing **[OFF]** on a handset.
  - Pressing **[EXIT]** on the base unit.

## Phonebook name display

When caller information is received and it matches a phone number stored in the phonebook, the stored name in the phonebook is displayed and logged in the caller list.

## Talking Caller ID

### Handset / Base unit

This feature lets you know who is calling by announcing the caller information.

To use this feature, you must:

- subscribe to a Caller ID service of your service provider/telephone company.
- turn this feature on (page 35, 37).
- store the name and phone number in the phonebook (page 27).

## Phonebook name announcement

When caller information is received from your service provider/telephone company and it matches a phone number stored in the phonebook, the stored name is announced following every ring.

If that phone number has not been stored in the phonebook, the caller information is announced.

### Note:

- The unit announces in English only.
- Name pronunciation may vary. This feature may not pronounce all names correctly.
- The announcement is heard at the same level as the ringer volume (page 19, 25, 34, 37).
- Depending on the number of rings setting (page 53), the answering system may answer calls before announcing the caller information.
- When you receive a call while on the phone, the 2nd caller information is not announced even if you subscribe to both Caller ID and Call Waiting with Caller ID services.

## Ringer ID for handset

You can select the desired ringer tone to a group that each phonebook entry is assigned

## Caller ID Service

(page 27). When a call is received from a caller assigned to a group, the ringer tone you selected for that group rings instead of the called line's ringer tone (page 15, 33, 34) after caller information is displayed. If you select "Current ringer" (default), the unit uses the called line's ringer tone you selected on page 34 when calls from this group are received.

- The ringer may be changed after the 2nd ring.

### Handset

- 1 [**←**] → [MENU]
- 2 [**↕**]: "Group" → [SELECT]

- If you do not want to dial the area code when making landline calls from the caller list, you can store the area code which you want the unit to delete automatically (page 43).

### Storing an area code to be deleted automatically (for landline call)

In some situations, phone numbers stored automatically in the caller list (page 42) will include area codes. If you do not want to dial the area code when making landline calls from the caller list, you can store the area code which you want the unit to delete automatically. **Example:** You have stored the area code "123". If you make a landline call from the caller list to the phone number "123-456-7890", the unit dials "456-7890".

#### Handset

- 1 [MENU]#255

#### Note for base unit:

- If you stored caller information to the phonebook using the base unit, the entry is automatically assigned to "Home".
- If you want to edit the caller name, you can do so using the handset (page 29).

## Copying phonebook from a cellular phone (phonebook transfer)

You can copy phonebook entries from the paired cellular phones or other cellular phones (not paired) to the unit's shared phonebook. A cellular phone must be compatible with Bluetooth wireless technology.

### Important:

- If a copied entry has 2 or more phone numbers, each phone number (6 max.) is stored as a separate entry with the same name.
- If a phonebook entry includes additional data such as a picture, that entry may fail to copy to the base unit.
- If your cellular phone includes international call entries, set the conversion codes before copying (page 45).

### 1 Handset:

[MENU]#618

### 2 Handset:

**To copy from paired cellular phones:**  
[↕]: Select the desired cellular phone. → [SELECT]

- Copied items are stored to the group ("Cell 1" or "Cell 2") which the cellular phone is paired to.

**To copy from other cellular phones (not paired):**

[↕]: "Other cell" → [SELECT] → [↕]: Select the group you want to copy to. → [SELECT]

### 3 When "Use the cell to transfer phone book" is displayed: Go to step 4.

**When "Select mode" menu is displayed:**

[↕]: Select "Auto" or "Manual". → [SELECT]

"Auto": Download all entries from the cellular phone automatically. Go to step 5.  
"Manual": Copy entries you selected.

- "Select mode" menu is displayed only when the cellular phone supports

PBAP (Phone Book Access Profile) for Bluetooth connection.

- Some cellular phones may require you to perform an operation on the cellular phone even if you select "Auto".

### 4 Cellular phone:

Follow the instructions of your cellular phone to copy phonebook entries.

- For other cellular phones (not paired), you need to search for and select the base unit. The base unit PIN (default: "0000") may be required.
- The entries being copied are displayed on the handset.

### 5 Handset:

Wait until "Completed" is displayed.

- You can continue copying other entries if necessary.

### 6 Handset: [OFF]

#### Note:

- Some copied entries may have characters which do not exist in the character table (page 27). These characters can be displayed but cannot be entered when editing an entry.
- The unit does not support some characters. If a copied entry includes those characters, they are replaced with other available characters or "\*".
- If you receive a call while copying phonebook entries, the copying procedure stops. Try again after finishing the call.

## Setting conversion codes

You must first set the following 3 dialing codes in the base unit which you want to copy to before transferring the phonebook from your cellular phone (each 4 digits max.).

- "International": An international prefix used when you make an international call.
- "Country code": Your country code for international calls.
- "National access": A trunk prefix; the initial digit(s) to be dialed in a domestic call, prior to the area code.

### Base unit

### 1 [MENU]

## Using Bluetooth Devices

- To store “International”: [#][1][1][7]  
To store “Country code”: [#][1][1][8]  
To store “National access”:  
[#][1][1][9]
- Enter the desired number. → [SAVE]
- [EXIT]

### Note:

- After you copy the entries, confirm that the numbers were transferred correctly.

## Using a Bluetooth wireless headset (optional) for landline calls

By pairing a Bluetooth headset to the base unit, you can have a hands-free conversation wirelessly for landline calls.

### Important:

- 1 headset can be paired to the base unit. However, only one Bluetooth device (cellular phone or headset) can be connected to the base unit at a time.
- For best performance, we recommend using a Bluetooth headset within 1 m of the base unit. A headset can communicate with the base unit within a range of approximately 10 m.

## Pairing a headset to the base unit

### Important:

- Make sure that the Bluetooth headset is not connected to any other Bluetooth device.

- Your headset:**  
Set your headset to pairing mode.
  - Refer to the headset operating instructions.
- Headset:**  
[MENU][#][6][2][1]
- If your headset PIN is “0000”, go to step 4.  
If your headset PIN is other than “0000”, press [CLEAR], then enter your headset PIN.

- Typically, default PIN is “0000”. Refer to the headset operating instructions.
- Press [OK], then wait until a long beep sounds.
  - [OFF]
    - When [X] is displayed on the base unit, the headset is available for use.

## Connecting/disconnecting a headset

If you cannot connect the headset and base unit using the headset, you can connect using the unit.

To use your headset with another Bluetooth device such as a cellular phone, you may need to disconnect it from the base unit.

### Important:

- Make sure that the headset is turned on.

### Handset / Base unit

- To connect/disconnect:  
[MENU][#][6][2][2]
  - A long beep sounds.
- Proceed with the operation for your unit.  
Handset: [OFF]

## Unpairing a headset

You can cancel a pairing of the headset that is stored to the base unit.

### Handset

- [MENU][#][6][1][2]
- [↕]: “Yes” → [SELECT]
  - When the headset is unpaired, the [X] disappears from the base unit display.
- [OFF]

## Operating a Bluetooth wireless headset using a landline

### Important:

- Refer to your headset operating instructions for headset operations.

## Using Bluetooth Devices

### Answering landline calls with your headset

To answer a landline call, turn on your headset referring to your headset operating instructions.

When you finish talking, turn off your headset referring to your headset operating instructions.

**Note:**

- If you cannot hang up the call using your headset, press [⏏] on the base unit 2 times.

### Switching between the base unit and your headset

You can switch between the base unit and your headset:

- during a landline call with the base unit speakerphone.
- during an intercom call between the base unit and handset.
- while listening to messages recorded on the base unit answering system.

■ **To switch to your headset:**

Press [↻] on the base unit.

■ **To switch to the base unit:**

## Answering System for Landline

### Answering system for landline

The answering system can answer and record calls for you when you are unavailable to answer the phone.

You can also set the unit to play a greeting message but not to record caller messages by selecting “**Greeting only**” as the recording time setting (page 54).

#### Important:

- Only 1 person can access the answering system (listen to messages, record a greeting message, etc.) at a time.
- When callers leave messages, the unit records the day and time of each message. Make sure the date and time have been set correctly (page 13).
- When the cellular line only mode is set (page 16), the answering system cannot be used and any messages are not received.
- Answering system announcements are in English only.

### Memory capacity (including your greeting message)

The total recording capacity is about 18 minutes. A maximum of 64 messages can be recorded.

#### Note:

- When message memory becomes full:
  - “**Messages full**” is shown on the handset and base unit display.
  - The ANSWER ON/OFF indicator on the base unit flashes rapidly if the answering system is turned on.
  - If you use the pre-recorded greeting message, the unit automatically switches to another pre-recorded greeting message asking callers to call again later.
  - If you recorded your own greeting message, the same message is still announced to callers even though their messages are not recorded.

### Turning the answering system on/off

#### Base unit

### Advanced new message alerting features

#### Audible message alert

This feature allows the base unit to beep to inform you of a new message arrival when new messages are recorded. The base unit beeps 2 times every minute until you listen to the messages, if the “Base unit beep” setting is turned on. The default setting is “Off”.

##### Handset

- 1 [MENU]#339
- 2 [↕]: Select the desired setting. → [SAVE] → [OFF]

##### Note:

- When the night mode is activated (page 38), the base unit beeps will not sound.

#### New message alert by a call

This feature allows the unit to make a call to the pre-stored phone number and inform you that a new message has been received by announcement.

To use this feature, you must:

- store a phone number to which the unit makes the call to.
  - turn on the new message alert setting.
- After you answer the new message alert call, you can listen to messages from that call (page 52).

##### Important:

- A new message alert is stopped 1 minute after the unit starts to call. The unit will not retry the call even if the call is not answered.

#### Storing a phone number to which the unit makes an alert call

### Activating/inactivating the remote access code to play messages

If you activate this feature, you must enter the remote access code (page 52) to play the new message from the new message alert call. This is so that unauthorized parties cannot listen to your messages. The default setting is “Inactivate”.

- “Inactivate”: You can listen to the message by pressing [4] to play new messages (without entering the remote access code).
- “Activate”: You must enter your remote access code (page 52) and then press [4] to play new message.

#### Handset

- 1 [MENU]# [3] [3] [8]
- 2 [↕]: “Remote code” → [SELECT]
- 3 [↕]: Select the desired setting. → [SAVE] → [OFF]

### Listening to messages

After you answer the new message alert, you can listen to the messages as follows.

#### ■ When the remote access code is set to “Inactivate”:

Press [4] to play the new message during the announcement.

#### ■ When the remote access code is set to “Activate”:

- 1 Enter the remote access code (page 52) during the announcement.
- 2 Press [4] to play the new message.

#### Note:

- Within 10 seconds after listening to new messages, you can press [F] [9] during the call to turn off the new message alert by a call feature.
- Even if the unit makes a new message alert call, the handset redial list does not show

the record. However, on the base unit redial list it is shown as “Message alert”.

## Remote operation

Using a touch-tone phone, you can call your phone number from outside and access the unit to listen to messages or change answering system settings. The unit’s voice guidance prompts you to press certain dial keys to perform different operations.

### Remote access code

A 3-digit remote access code must be entered when operating the answering system remotely. This code prevents unauthorized parties from listening to your messages remotely. The default setting is “111”.

#### Important:

- To prevent unauthorized access to this product, we recommend that you regularly change the remote code.

#### Handset

- 1 [MENU]# [3] [0] [6]
- 2 Enter the desired 3-digit remote access code.
- 3 [SAVE] → [OFF]

### Deactivating remote operation

Press [X] in step 2 on “Remote access code”, page 52.

- The entered remote access code is deleted.

### Using the answering system remotely

- 1 Dial your landline phone number from a touch-tone phone.
- 2 After the greeting message starts, enter your remote access code.
- 3 Follow the voice guidance prompts as necessary or control the unit using remote commands (page 53).
- 4 When finished, hang up.

## Answering System for Landline

### Voice guidance

During remote operation, the unit's voice guidance starts and prompts you to press **[1]** to perform a specific operation, or press **[2]** to listen to more available operations.

#### Note:

- If you do not press any dial keys within 10 seconds after a voice guidance prompt, the unit disconnects your call.

### Remote commands

You can press dial keys to access certain answering system functions without waiting for the voice guidance to prompt you.

Key	Operation
<b>[1]</b>	Repeat message (during playback) <sup>*1</sup>
<b>[2]</b>	Skip message (during playback)
<b>[4]</b>	Play new messages
<b>[5]</b>	Play all messages
<b>[9]</b>	Stop playback
<b>[0]</b>	Turn answering system off
<b>[*][4]</b>	Erase currently playing message
<b>[*][5]</b>	Erase all messages
<b>[*][#]</b>	End remote operation (or hang up)

- \*1 If pressed within the first 5 seconds of a message, the previous message is played.

### Turning on the answering system remotely

If the answering system is off, you can turn it on remotely.

- 1 Dial your phone number from a touch-tone phone.
- 2 Let the phone ring 15 times.
  - A long beep is heard.
- 3 Enter your remote access code within 10 seconds after the long beep.
  - The greeting message is played back.

- You can either hang up, or enter your remote access code again and begin remote operation (page 52).

## Answering system settings

### Number of rings before the unit answers a call

You can change the number of times the phone rings “**Ring count**” before the unit answers calls. You can select 2 to 7 rings, or “**Toll saver**”.

The default setting is “**4 rings**”.

“**Toll saver**”: The unit's answering system answers at the end of the 2nd ring when new messages have been recorded, or at the end of the 5th ring when there are no new messages. If you call your phone from outside to listen to new messages (page 52), you know that there are no new messages when the phone rings for the 3rd time. You can then hang up without being charged for the call.

### For voice mail service subscribers

To receive voice mail and use answering system properly, please note the following:

- To use the voice mail service provided by your service provider/telephone company rather than the unit's answering system, turn off the answering system (page 48).
- To use this unit's answering system rather than the voice mail service provided by your service provider/telephone company, please contact your service provider/telephone company to deactivate your voice mail service.

If your service provider/telephone company cannot do this:

- Set this unit's “**Ring count**” setting so that this unit's answering system answers calls before the voice mail service of your service provider/

### Selecting "Greeting only"

You can select "Greeting only" which sets the unit to announce a greeting message to callers but not record messages.

Select "Greeting only" in step 2 on "Caller's recording time", page 54.

#### Note:

- When you select "Greeting only":
  - If you do not record your own message, the unit will play the pre-recorded greeting-only message asking callers to call again later.
  - If you use your own message, record the greeting-only message asking callers to call again later (page 49).

## Voice Mail Service for Landline

### Voice mail service for landline

Voice mail is an automatic answering service offered by your service provider/telephone company. After you subscribe to this service, your service provider/telephone company's voice mail system answers calls for you when you are unavailable to answer the phone or when your line is busy. Messages are recorded by your service provider/telephone company, not your telephone. Please contact your service provider/telephone company for details of this service.

#### Important:

- To use the voice mail service provided by your service provider/telephone company rather than the unit's answering system, turn off the answering system (page 48). For details, see page 53.

### Storing the voice mail (VM) access number

In order to listen to your voice mail messages, you must dial your service provider/telephone company's voice mail access number. Once you have stored your voice mail access number, you can dial it automatically (page 55).

#### Handset

- 1 **[MENU]#[3]3[1]**
- 2 Enter your access number (24 digits max.). → **[SAVE]** → **[OFF]**

#### Note:

- When storing your voice mail access number and your mailbox password, press **[▲]** (Pause) to add pauses (page 19) between the access number and the password as necessary. Contact your service provider/telephone company for the required pause time.

#### Example:
